Everybody's Talking, goes a famous songline by Harry Nilsson. One thing everybody's talking about is insurance linked securities (ILS); financial instruments that are used as alternatives to traditional reinsurance for general insurance and life insurance. But what are ILS and how do they work?

Professor Alan Punter (London) will tell the audience about the evolution of ILS, their characteristics, and the current and future developments of the market.

- 1) Introduction - the convergence of the re/insurance and capital markets
- 2) Examples of the principal forms of Insurance-Linked Securities (ILS) - cat bonds, etc
- 3) Current developments in the re/insurance and ILS markets, and future prospects
